# GULF READYMIX - ORGANISATION CHART

## ABOUT US |

Gulf Readymix was founded in 2005 with one site in the Doha Industrial Area and has since expanded to become one of the fastest growing readymix companies in Qatar. The company now has four sites, each with two batching plants, a fleet of some 70 truck mixers, 13 concrete pumps plus fully equipped labs at each site location.

The readymix plants are situated in the Doha Industrial Area, Ras Laffan, Dukhan and Shamal. The production capacity for each plant is 120m<sup>3</sup> per hour with all eight plants being fully automated and containing water chilling units, ice plants and state of the art admixture dispensers. With two plants on each site there is capacity to produce 240m<sup>3</sup> per hour should that be required.

Gulf Readymix is part of the MJK Group which was originally founded in 1968 as Mohd. Jassem Al Kuwari & Sons. The Group is a family run business: 100% Qatari owned and managed by the sons of the late founder. The original principles of the business are still strictly adhered to; namely integrity, correct behaviour and value for money. In addition to the readymix company the group also has the following sister companies:

- Gulf Blocks and Paviers
- Gulf Equipment Hire Company
- MJK Contracting & Trading
- MJK Real Estate
- Jama Marble & Granite
- Jama E&M Engineering Co.
- Jama Techno Metal Co.
- Qatar Agency (supply of heavy equipment)
- Arabian Quarries
- Gulf Techno Floor Company (super-flat laser levelled concrete floors)
- Gulf Carpet Factory

## OUR MISSION

Gulf Readymix's vision is to be Qatar's leading supplier of quality ready mixed concrete. Being the best means providing outstanding quality, service and value so we consistently surpass our customer's expectations.

**OUR LOCATIONS**

## PRODUCTS & SERVICES

Gulf Readymix supply quality assured ready mixed concrete to all segments of the market. We can supply anything from a 3m<sup>3</sup> domestic yard to a 4000m<sup>3</sup> raft foundation and more.

Whether it is large or small, residential, industrial or commercial our aim is to supply the best quality concrete, fit for purpose. We can supply the complete range of mixes spanning lean mixes up to 120 newton high-strength concrete, shotcrete, self-compacting concrete, high early-strength concrete, waterproof concrete, slip-form concrete, light-weight concrete plus all types of grout.

Our state of the art computerised Alkon batching system and our extensive fleet of truck-mixers and pumps are available for delivery to all locations in Doha city, Industrial Area, Al Khor, Al Dukhan ,Shahaniya ,Ras Laffan and Shamal any time of the day or night.

We can supply a variety of different cement types including OPC, SRC, GGBS, PFA and Microsilica. These cement types have become widely accepted as the best way to counteract the aggressive conditions endured by concrete structures in the Gulf region.

To combat the challenges of concreting in very hot weather we have industrial ice machines and water chillers at each of our batching plants.

We have our own supply of aggregates: Arabian Quarries, which gives us control over supply of our raw materials and control over the quality of materials being delivered to our plants.

We are currently in discussion with an admixture supplier with a view to setting up a strategic alliance to give us more control over the quality, cost and performance of our admixtures.

## QUALITY

Our Quality Assurance programme is an integrated, proactive system designed to maximize the quality of everything we make.

Our Quality Control programme measures that quality using the benchmark of the Qatar National Standard and also International Standards.

Our methods, products and facilities are regularly assessed and monitored by professional independent laboratories. Alongside rigorous testing of raw materials our QA and QC programmes include a regular planned preventative maintenance regime covering our facilities and vehicles. In addition we have accreditation from Ashghal, Kahramaa, Qatar General Electricity & Water Corporation, Ras gas, Qatar foundation, and Qatar Petroleum and other many institutions and authorities.

Our full-time technicians maintain up-to-date records and our laboratories, vehicle fleet and plant facilities are subject to regular State inspections. In all instances we meet QCS, ASTM and BS - EN standards.

## CONTROL LABORATORIES

We have fully equipped concrete laboratories on all our readymix plants which enable us to conduct the complete range of periodic materials testing quickly and easily.

Within each laboratory we have crushing machines, drum and pan mixers to enable batching and testing of plastic concrete, curing tanks, ovens and the full range of equipment to carry out both coarse and fine aggregate testing.

All our laboratories are inspected and calibrated by the Ministry of the Environment Central Laboratories Department.

## HEALTH & SAFETY POLICY

At Gulf Readymix we give the highest priority to safeguarding the health and safety of our employees and preventing incidents. We are 100% committed to carrying out our business activities in a safe and efficient manner and to care for the well-being of those on our sites who may be impacted by our activities.

To meet this commitment we will:

- Provide the necessary resources for instruction, training and supervision to ensure the health and safety of our employees.
- Investigate, monitor and report our health and safety performance.
- Maintain open communication channels with our employees, contractors, customers and other stakeholders who work with us.
- Comply with company policies and procedures and all applicable local laws.
- Provide a safe and healthy workplace for our employees and contractors by implementing and maintaining systems that prevent risk in our activities.

Everyone who works for Gulf Readymix is responsible for demonstrating correct H&S behaviours and reporting potential risks to themselves and others.

## ENVIRONMENTAL POLICY

Gulf Readymix operations are carried out by trained and competent personnel in such a way as to ensure, so far as is reasonably practicable, that the environment is not adversely affected by our operations.

Environmental protection plays an important part in the culture and behaviour of Gulf Readymix. Our Environmental Management System has been developed to meet and in many cases surpass the requirements of ISO 14001:2004 and has been rolled out to all our employees and other stakeholders.

The Environmental Management System is regularly reviewed and constantly monitored as part of our continual improvement process.

## OUR FLEET

Ready mixed concrete must be manufactured, inspected, transported and placed within two hours which makes it essential to have a sizeable fleet to ensure rapid delivery and placement.

Gulf Readymix has a fleet of 70 truck mixers with the majority having 9m<sup>3</sup> capacity drums. In addition the company has 13 mobile concrete pumps with boom lengths from 34-58 metres. We also have stationary pumps which can be based on site. We have a workshop at our Industrial Area site where regular planned, preventative maintenance is carried out on both truckmixers and concrete pumps.

Our truckmixer drivers and pump operators have all received health and safety training which is regularly updated.

## Certificate of Conformance For Concrete Production Facilities

THIS IS TO CERTIFY THAT

*Al Shamal Plant 2, Al Shamal, Qatar*  
*Gulf Readymix*

has been inspected by the undersigned licensed professional engineer for conformance with the requirements of the *Check List for Ready Mixed Concrete Production Facilities*. As of the inspection date, the facilities met the requirements for production by

*Central Mixing with Automatic Batching*

A handwritten signature in blue ink, appearing to read "Anthony", is written above a horizontal line.

Signature of Licensed Professional Engineer

*Grey Matters*  
www.greymatters.ws  
(Seal)

*August 09, 2022*

Inspection Date

*September 20, 2024*

Certification Expiration Date

This company will maintain these facilities in compliance with the *Check List* requirements and will correct promptly any deficiencies which develop.

A handwritten signature in blue ink, appearing to read "Al Jaber", is written above a horizontal line.

**Scope of Audit:** Qatar General Organization for Standardization (Quality and Conformity Department) hereby attests that test results for Samples of materials and mixes as described above conform to the requirements of the standard specifications as per QCS 2014.

**This attestation had based** on the results of tests conducted on random samples selected from the above materials and mixes using sampling procedures given in the specific rules and evaluated as per QCS 2014. **It is applicable** only to the materials and mixes as described in this Certificate and does not cover the entire production of the factory or others branch of the company.

**Responsibility:** Materials and mixes mentioned above or not; shall be check for quality of products at any time according to QCS 2014 with the requirements of the projects and approved by Engineer or Consultant. All mixes were marking with (\*) mean Cementitious contents in excess of 400 kg/m<sup>3</sup>, and shall not be used unless special consideration has been given to the effect for heat of hydration and reduce thermal stress in the concrete.

**Recommendations@:** In accordance with the principals of (ACI-214) relating to ready-mix concrete factories to the purpose of differentiate between producers and dividing them into classes, or categories as per performance and control of quality.

**Restrictions\*:** It has not permitted to use materials not listed in this certificate without approval from Quality and Conformity Department.

**Condition:** The above ready mixed plant/supplier had founded to be satisfactory at the time of inspection and quality audit (In accordance with Qatar standard regimes and requirements of the QCS 2014) this certificate will remain valid until the Period have shown above, Quality and compliance audits will carry out by Qatar General Organization for Standardization (Quality and Conformity Department) in order to prove that the quality procedure is satisfactory.

**Notes:**

1. QS has no any responsibility for supplying of modified or poor quality by the manufacture / supplier during the validity period.
2. It is important to apply two months before expiry date of validity for renewal of this conformity certificate.
3. The required fee for this certificate has been stated according to the decision No. (112)/2019

Recommended by:  Head of CC Section  
 Authorized by:  Director of Quality & Conformity Dept.  
 Approved by:  PRESIDENT, QGOS

## CERTIFICATION OF REGISTRATION

This is to certify that  
**Occupational Health & Safety Management Systems**  
of

**GULF READYMIX**

P.O. Box: 2050, Doha, State of Qatar

Has been assessed and found to meet the requirements of:

**ISO 45001:2018**

The certificate is valid for the following scope of operation:

**Production & Supply of Readymix Concrete**

Certificate No. O-01334

Initial Registration Date: 21/01/2020

Certificate Issue Date: 20/12/2020

\*Next Audit Due Date: 06/01/2022

Certification Expiry Date: 20/01/2023

\*In case if Surveillance Audit is not allowed to be conducted on or before the specified date, the Certificate shall be Suspended/Withdrawn.

\*After successful completion of surveillance audit, new certificate shall be issued

In the course of validity of the present certificate the client management system must permanently satisfy the requirements of the International Regulations. The fulfilment of these regulations will be regularly controlled by The Certification International.
